

MD ALAMIN AHMED

Full Stack Developer (MERN / Next.js)

+880 1778911386 | alaminahmed.dev@gmail.com | Dhaka, Bangladesh

[Portfolio](#) | [GitHub](#) | [Linkedin](#)

CAREER OBJECTIVE

Full Stack Developer skilled in Next.js, TypeScript, and PostgreSQL, with hands-on experience building production-style applications including role-based dashboards, JWT authentication, and multi-gateway payment integration (Stripe, SSL Commerz). Completed diploma in Computer Science and a self-driven web development track covering the MERN/Next.js stack. Looking for a Full Stack Developer role where I can contribute to real-world products and grow within a development team.

SKILLS

Frontend: HTML5 | CSS3 | Tailwind CSS | JavaScript | TypeScript | React.js | Next.js | Context API

Backend & Database: Node.js | Express.js | REST API | MongoDB | PostgreSQL | Prisma | JWT

Tools & Technologies: Git | GitHub | Postman | Firebase | Stripe | Vercel | Figma

Soft Skills: Effective Communication | Teamwork | Time Management | Problem Solving | Adaptability

PROJECTS

1. FixItNow — Home Services Marketplace — [Live Link](#) | [Client Code](#) | [Server Code](#)

FixItNow is a home service marketplace built to solve the trust and tracking gap in local service booking (electricians, plumbers, cleaners) — connecting customers with verified technicians through real-time booking, secure payments, and role-based dashboards.

- **Solved Real Booking Problems** — Replaced unreliable phone-based service booking with a structured platform where customers browse verified technicians, check availability, and book time slots in a few clicks.
- **End-to-End Booking & Payment Flow** — Built full booking lifecycle tracking (pending → confirmed → completed → cancelled) with dual payment gateway integration (Stripe + SSLCommerz) for secure, flexible transactions.
- **Role-Based Access for 3 User Types** — Designed protected dashboards for Customer, Technician, and Admin roles, each with tailored features — booking management, availability scheduling, and platform-wide user/category control.

Technologies Used: Next.js, TypeScript, Tailwind CSS, shadcn/ui, Node.js, Express.js, PostgreSQL, Prisma, JWT, Stripe, React Query, Zod, React Hook Form

2. Delish — Food Delivery App — [Live Link](#) | [Client Code](#) | [Server Code](#)

Delish is a full-stack food delivery platform built to make local restaurant discovery and ordering faster and more accessible — combining secure payments with a voice search experience that removes typing friction from the ordering flow.

- **Faster Restaurant Discovery** — Enabled users to browse restaurants and menus and find dishes quickly through an integrated voice search feature, reducing reliance on manual typing and scrolling.
- **Secure End-to-End Ordering** — Built a complete ordering flow with Stripe payment integration, letting users place orders and pay securely without leaving the app.
- **Protected, Reliable APIs** — Implemented JWT-based authentication and CORS-protected REST APIs as part of a team-based build, ensuring safe order handling and reliable data access across the platform.

Technologies Used: Next.js, Tailwind CSS, Firebase, Context API, Node.js, Express.js, MongoDB, CORS, JWT

EDUCATION

Diploma in Computer Science & Technology (CST)

Mir Shamsul Islam Polytechnic Institute | Session: 2021–22 | Status: Completed
